Feature story

Panel PC Development and Strategy

Advantech PPC team is dedicated in developing diversified Panel PCs to meet versatile requirements for global partners. The PPC team has short-listed three important strategies which bring about the necessary change and progress. (1) Continue revising and upgrading PPC models, but suspend new series general-purposed PPC. (2) Branch out a differentiated product for new demand of current market. (3) Derive a specific product line that will cater specifically to a new vertical market.

New PPC Phase-in

PPC-174T: Multi Functional Intel® Pentium® 4 Panel PC with Hyperthreading

PPC-174T is the most powerful multifunctional PPC from Advantech! It features a large 17" LCD panel, a multi card reader that supports the most popular media cards, and a powerful Pentium® 4 CPU with Hyperthreading. PPC-174T is packed with the power you need for demanding applications. The PPC-174T comes with a 3.5" removable HDD Bay, while the 6-in-1 card reader interface gives capabilities that makes the PPC-174T closer to a computing center than a standard human-machine-interface.
